

## Helical Antenna Mounts

TACO has two mounting options for the Helical Antennas. The AM-1 Mount is designed to fasten the Helical antenna to a mast. The elevation adjustment is in fixed increments. Made from hot dip galvanized steel, the AM-1 is a rugged mast mount built to withstand the harsh elements. The HM-5 Tripod Mount is a versatile Tripod Mount with complete adjustment aligning your Helical Antenna to any azimuth or elevation angle. See the chart below for more details.

### MECHANICAL MOUNTS SPECIFICATIONS:

MODEL(S)	TYPE	HEIGHT	POSITION AZ	EL	WEIGHT (NET)	ANTENNA MAST	MOUNTING PIPE
