LOG PERIODIC ANTENNAS

- **LPD-7, LPD-12**

The LPD Series Log Periodic antennas are rugged for harsh environments. Two models are available LPD-7 and LPD-12. These Log Antennas are broadband and have flat gain levels across the entire frequency range. This broadband design minimizes de-tuning caused by ice. The antennas are cantilever mounted for ease of installation. All mounting hardware is included to mount up to a 3" O.D. pipe. The antennas are made of aluminum for light weight and longevity.
