

# FALL ARREST SAFETY RAIL SYSTEM FOR DMX TOWERS

## *MAXIMUM CLIMBING PROTECTION FOR INSTALLATION PERSONNEL*

The Safety Rail System eliminates the need for platform, safety cages, or offset ladders. Falls are instantly arrested when a sudden downward motion is applied to the Trolley. Trolley meets [CSA](#) (Z259.2-M1979) and [OSHA](#) (1910.20) regulations.

### TROLLEY

- Lightness of the Trolley provides easy movement
- Trolley wheels slide smoothly along the safety rail as the climber moves up and down a structure.
- Trolley remains stationary once the worker disconnects the unit from his harness.
- Swivel snap hook attaches to climber's harness.

### SAFETY RAIL

- Installs easily and quickly to any location along the tower leg on all DMX models.
- Made of light weight Aluminum.
- Rail sections can be bent in and out to a few degrees, along vertical structures that slightly vary in direction.
- Available in standard 20' sections. Also available in smaller pieces for fitting.
